Retain & expand ibanking user base with instant customer satisfaction

Responsive, relevant and deeply personal banking experience for everyone

Looking to offer easy and fun internet banking to your customers?

Imagine an instant search experience with super fast touch screen and visual exploration of your banking payments and money flows. Imagine live analytics responding to your every interaction in the most relevant way. Imagine one single view across all your accounts.
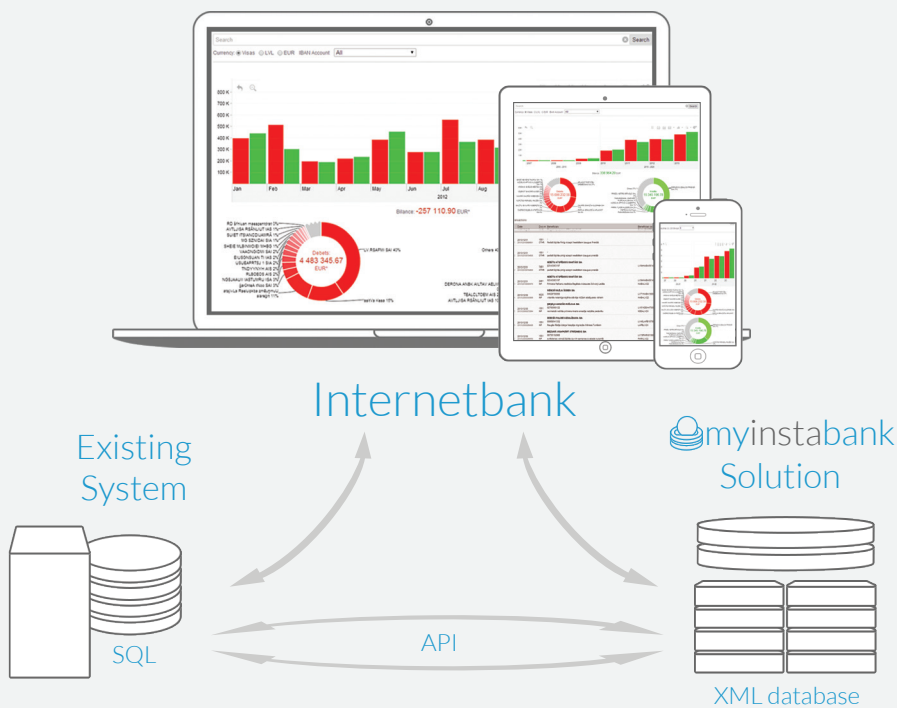

MyInstaBank software delivers the ideal banking experience. It's a platform solution for the future that works along existing bank's systems without compromising security and reliability.

○ Most dynamic online banking experience

○ Instant tracking & analytics facilitates debit/credit card use

○ The best way to search & view all historic payments

○ Ready-made platform to service distributed web and mobile demand

○ Live data replication via snap integration with existing bank's platforms

○ Cost-efficient scalability via rack & stack commodity hardware
